REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 11 and 12 the prior arts fail to teach or fairly suggest a method of assigning resource units within a cell of a wireless time division duplex communication system each resource unit is associated with a time slot and a code, the method comprising:

for selected ones of the cell's resource units, measuring a code interference level during that resource unit's time slot using that resource unit's code and determining whether that resource unit has an acceptable code interference level based on a comparison of that resource unit's measured code interference level with a threshold;

producing a preference matrix indicating which of the selected ones resource units are eliminated, in combination with other limitations as specified in the independent claims 11 and 12.

Regarding claim 13 the prior arts fail to teach or fairly suggest wireless time division duplex communication system using code division multiple access comprising:

a base station comprising:

a resource unit assignment device for receiving code interference levels for resource units, producing a preference matrix using the received code interference levels, and assigning resource units to communications using the preference matrix; and

a user equipment comprising:

a resource unit assignment device for outputting code power interference measurements for use by the base station and assigning resource units to communications using the resource units assigned by the base station, in combination with other limitation as specified in the independent claim 13.

Conclusion

2. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thien Tran whose telephone number is (571) 272-3156. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.
